CARRER GOAL

Creative and detail-oriented Frontend Developer committed to delivering responsive, user-friendly, and scalable web applications. Skilled in clean coding, modern design principles, and performance optimization to achieve excellence. Passionate about crafting seamless digital experiences and contributing to a collaborative team focused on driving the company's mission and building transformative products

PROFESSIONAL EXPERIENCE

Frontend Developer

Enigmatix (Pvt) Ltd, Bahawalpur February 2025 - Present

- Developed and maintained scalable frontend features, including API integration, third-party services, and efficient state/store management to ensure smooth data flow.
- Designed and implemented responsive, user-friendly UIs, aligning with modern design principles and enhancing overall user experience.
- Collaborated with the team to debug and resolve issues, improving performance, reliability, and delivery timelines of core projects.

Frontend Intern

August 2024 - January 2025

Enigmatix (Pvt) Ltd, Bahawalpur

- Explored and worked with different frontend libraries and frameworks, gaining hands-on experience in real-world development practices.
- Contributed to multiple projects, gaining exposure to diverse codebases, workflows, and problem-solving approaches.
- Applied core frontend knowledge (HTML, CSS, JavaScript, React, etc.) in actual implementation, bridging theory with practice.

PROJECTS

- **Tour & Travel Website –** Built a fully responsive travel booking platform with a focus on frontend development using React, Tailwind CSS, and Ant Design. Integrated Firebase for authentication and database management.

- **NeuroScan (AI-based Project)** – Designed and implemented an AI-powered web application for brain tumor detection, combining UI design with AI model integration for real-world healthcare impact.
